If it stings when you piss...

get an STI test.

You might have gonorrhoea or Chlamydia. Having either can increase your chances of picking up or passing on HIV.

Consider others and avoid having sex until you get a test.

For more info on STIs, testing, treatments or the location of clinics and doctors, check out www.whytest.org or call the Sexual Health Infoline on 1800 451 624.
